Summary

Computer Science and Information Systems student with a 3.60 CGPA and a focus on AI & Data Science. Advanced in Python and C++, with project experience in data analysis, web development, embedded systems, and software engineering.

Education

Bachelor of Computer Science and Information Systems, 2025 – Present
October 6th University (O6U) Egypt
Currently in General Track
CGPA:3.60/4.00 | **Relevant Coursework:** Digital Systems, Discrete Mathematics

Key Skills

Programming

Python (Advanced), C++ (Advanced), JavaScript (Advanced), HTML, CSS

AI & Data

NumPy, Pandas, Matplotlib, PyTorch, TensorFlow, ML, Data Analysis

CS & Tools

OOP, Data Structures, Algorithms, Git, Linux, Jupyter Notebook, Google Colab, SFML

Networking & Embedded

IP Addressing, Subnetting, Routing & Switching, Troubleshooting, Arduino, Embedded Systems

Languages

Arabic (Native) · English (C1) · French (A1) · German (A1)

Selected Projects

Smart Parking System, Team Leader | C++ · Arduino · IR Sensors · Servo Motors

- Led a 5-member team to develop an automated parking system using Arduino, IR sensors, and servo-controlled gates
- Handled component procurement, wiring, C++ development, hardware/software integration, demonstration design, and documentation
- Personally presented the project to the Faculty Dean and University President; the project was selected as the top project..

Interactive Web Application — Front-End Development, HTML · CSS · JavaScript

- Developed a dynamic front-end featuring interactive games, sign-in interfaces, themes, score tracking, and dynamic content.
- Implemented JavaScript logic for user interactions, application behavior, and interactive UI elements.

C++ Application Portfolio, C++ · OOP · Data Structures & Algorithms · SFML · File Handling

- Developed a Sudoku Solver using recursive backtracking with an SFML graphical interface.
- Built a multi-semester CGPA Calculator and file-based Login & Registration System with persistent user data.
- Developed a Banking System supporting multiple accounts, deposits/withdrawals, transfers, transaction history, and account statements.

Large-Scale CSV Data Processing & Analysis, *Python · Pandas · NumPy · Jupyter Notebook*

- Processed and cleaned datasets containing tens of thousands of records using Pandas.
- Applied filtering, restructuring, and formatting to prepare datasets for analysis and machine-learning workflows.
